JEMS in Manlifter & Fire fighting Eqpt. Industry

JEMS is the pioneer in Manlifter industry since 1988, And we would like to introduce proudly with challenge in professional technical services & supplies in all kinds of used & new Man lifter & Fire Fighting Truck and spare parts in around middle east gulf & arab countries.

We have well experienced qualified engineers technicians with well equipped workshop and able to provide fast & reliable service facility with guaranteed work perfection.

Our Branches in Bahrain-Salmabad, Saudi-Dammam, Qatar-Doha, UAE-Dubai, Singapore-Jurong and China-Shanghai.

Our Mission

Mission is to make easy & environment friendly wireless monitoring with automation to maintain, operate & protect Man lifter & Fire Fighting Truck from unexpected breakdowns, expense and damage.

Our Vision

Our Vision is to become the gulf preferred Man lifter & Fire Fighting Truck professional service support provider & supplier through consistently exceeding our customers' expectations with responsive and high quality service at a competitive offer.

Selling, Buying, Exchange & Rental

We Import & Supply all kinds of Used & New Man lifter & Fire Fighting Truck, Equipments, Spare Parts, Accessories & Consumables.

Selling Used & New Manlifts

We offer appraisals of aerial work platforms. Experienced experts who have been in the aerial lift business for years will give you a fair and accurate estimate. Our appraisals often include personal inspections in order to provide more accurate information, thereby allowing your company to make the best management decision possible.

Jupiter is one of the leading surplus forklift buyer and also buying even faulty, damage, breakdown, failure, rejected, scrape & accident Manlifts nationwide, Jupiter knows what it takes for a smooth transaction. Prompt payment, and timely and careful removal are all key aspects of buying forklifts.

Buying Used & New Manlifts

Jupiter is one of the leading surplus Manlift buyer and also buying even faulty, damage, breakdown, failure, rejected, scrape man-lifter nationwide, Jupiter knows what it takes for a smooth transaction. Prompt payment, and timely and careful removal are all key aspects of buying manlifts.

Our main focus

- 🔧 New & Used Manlifter Sales
- 🔧 Inspection and Valuation
- 🔧 Erection & Commissioning
- 🔧 Preparation for Shipment
- 🔧 Parts Supply & Load Testing
- 🔧 Recommendation & Site Consultation

Rental & Long Leasing Cranes

Jupiter rental fleet covers all ranges of cranes in the craning industry.

We are able to provide unique base foundation applications, various types of internal and top climbing equipment, and we have a wide range of heavy lift to small self erect tower crane types available.

We will match the crane to the job site, not the job site to the crane.

We can advise of crane overlap precautions, job site rigging recommendations, and everything inclusive of crane camera systems for the tight working in the blind projects.

From foundation anchors to high rise derrick cranes, we are able to service all of your lifting needs.

We have manlifts exchange offer according to your requirements with your existing manlifts new or used @ any lifting capacity & brand.

Exchange Used & New Manlifts

We have forklifts exchange offer according to your requirements with your existing manlifts new or used @ any lifting capacity & brand.

Types of ManLifts

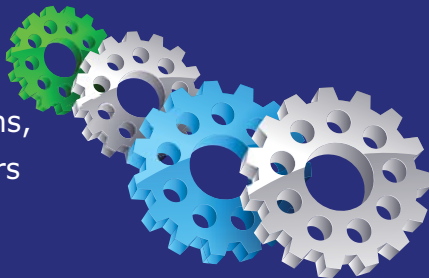

- Telescopic Boom Manlifts
- Articulated Boom Manlifter
- Trailer-mounted boom lift
- Platform extension Manlifts
- Vertical personnel lifts
- Battery Powered Manlifter
- Diesel Scissor Manlifter
- Battery Powered Scissors
- Crawler-Mounted Lifts
- Truck Mounted

Spare Parts & Accessoriess

Our parts centers are supply replacement parts for all makes & models of Man lifter & Fire Fighting Truck even older Cranes that are no longer manufactured.

We are also able to offer a backup unit from our hire fleet in instances where the customer's Cranes is removed from service for major service work clients.

- Fast, Knowledgeable Service
 - OEM Spare Parts
 - Obsolete Equipment Parts
 - General Overhaul (GO) Packages
 - Replacement Parts
-
- All Brand & Non-Brand Cranes
 - Engine Block, Parts & Spare Parts
 - Electrical Electronic Control Panels
 - Alternators
 - Starter
 - Radiators, Fans,
 - Turbo Chargers
 - Starter Motors
 - Alternators
 - Air Valves, Booster
 - Servo Assemblies,
 - Master Cylinders
 - Radius Cables, Gearbox,
 - Engine Parts
 - Transmission air cylinder, Actuating cam

Manlift Reconditioning

Aerial work platforms in the range of 5 to 7 years old are primary candidates for our reconditioning process. There are several levels of value to this process — ranging from a basic reconditioning to more extensive needs, such as engine rebuild, conversion from two-wheel drive to four-wheel drive, or reconfigurations. All JLG reconditioning work is backed by our six-month parts and labor warranty, and includes annual inspection and field safety bulletin updates. [Click here to view the scissor lift process](#), or [click here to view the boom lift process](#).

Why should a machine be reconditioned?

- Reduce operating costs to like new levels
- Increase machine productivity and performance
- More economical than repairing systems individually
- Increases resale value and / or rental rates from 15% to 50% depending on condition
- Extends the useful life of an asset Preserves capital
- Can help equalize fleet age
- Improves your company's image

Custom Design Manlifter

Jupiter has been in the Elevated Access Industry since the year 1988. Sometimes our customers are unable to meet their needs with standard products. Our comprehensive approach to solving our customer's problems resulted in the introduction of our new Custom Access Solutions Department. From customizing a rolling platform's height to a completely custom designed aircraft taildock, we can make the adjustments needed to meet your needs.

Consultation

Our experienced team will collaborate with you and your company through online meetings, telephone conferences, and even on-site evaluations. We take a thorough approach to meeting your needs while providing a design to maximize safety, ergonomics, and efficiency.

Design

Our professional engineers use the most comprehensive engineering software available today. We are able to provide conceptual 3D imagery of your design. Our process ensures you approve and receive the best solution.

Fabrication

Our fabrication department is capable of producing products in a timely fashion and they will do whatever is possible to meet your goals on time. Our staff has completed custom work platforms and many other custom elevated access solutions in a wide range of industries.

Installation

We want your company to focus on your business, not the business of assembling products. If a project becomes very large and unable to ship assembled, we can install it. If our own team is unable to perform the install, we can coordinate with any number of contract crews in your local area to get the job done.

Manlift Remote Controls

Jupiter has decades of experience designing control systems for manlifts for many of the largest names in the industry; our controls have years proving themselves in the field day after day. We design custom platform control stations that interface with a lower control via CAN, plain wire, RF, or fiber optic cable, or have standard systems pre-designed.

If an OEM has joysticks, switches, pedals, and lights that they are used to, our 3-In-1 module is a small box that will interface between the controls on the upper and the outputs on the lower, providing a seamless failsafe between RF, CANbus, AND fiber optic link for redundant control methods in the case of severed wires, noisy environments, poor RF conditions, etc. The 3-In-1 has enough horsepower to handle your logic and interlocks as well. The 3-In-1 and our manlift systems are built in IP-67 enclosures with silicone dip-coated electronics and all sealed components, like our other controls, to withstand whatever beating the elements can throw at them.

Manlift Custom Fabrication

Jupiter prides itself on quality built products. Our engineering department ensures Jupiter projects are completed in conformance with CSA standards and the OBC. Count on Liftsafe from inception, to engineering, to final installation. We do the job right the first time!

Jupiter has the capabilities and resources to provide custom and miscellaneous fabrications to customer specifications from our in house design or customer supplied drawings & specs. Our in house efficiency can offer competitive pricing and quality products delivered on time to our customers to meet their installation schedules or can also be installed by Jupiter

Manlift Platform Safety Training

Avoiding serious accidents involving aerial lifts starts with knowing how to safely operate and inspect them in accordance with the International standards. After completion of our Aerial Lift Platform Safety Training, you will have gained the background to make decisions on the inspection, use, and operation of aerial platforms. This course is presented by a Factory Trained Instructor who provides the trainee with required evidence in the form of a wallet card .

- **Consulting.** Jupiter will perform detailed analyses and assessments of your fleet and advise you about whether to rebuild or replace equipment. We'll also assist you in the procurement process, both purchases and leases.

- **Operator and maintenance training.** Jupiter experts work directly with your people, delivering intensive training that can raise the productivity of your staff and also enhance the performance and service capabilities of your Jupiter fleet. We'll show your personnel the benefits of a wide range of key maintenance strategies, including how to best approach each of the following: troubleshooting potential problems; identifying

- **Pre-season deicer checks.** We visit your facility well in advance of the first snowfall to evaluate and assist you in repairing and preparing your deicing equipment. This prevents downtime before it can happen. Our checks include cleaning the heater assemblies as well as rigorous operational testing to ensure that your equipment is fully functional in time for the season's first

- **Onsite heavy maintenance.** Jupiter helps you increase the effective serviceability of your Jupiter fleet, and we provide preventative solutions that can significantly reduce out-of-service time. With us onsite, you'll save time and costs because we help

Erection & Commission

Installation of Man lifter & Fire Fighting Truck requires experience and attention to detail to prevent potentially dangerous safety issues. JEMS offers unparalleled experience and expertise in start-up Installation of the following:

- Electrification Systems
- Modernizations
- Relocations

Load Testing

We test the Man lifter & Fire Fighting Truck over a range of loads, monitoring and data gathering constantly for 2 to 4 hours. We eventually test the load capacity of the Crane, giving the machine a thorough workout in the process.

Features:

- Compact design, Corrosion resistant
- Remote, touch type control

Periodical maintenance

JEMS offers customized maintenance programs for your operation. From compliance and repairs to preventative & periodical maintenance, JEMS has the right maintenance program for your application, including:

- Compliance Programs
- Preventative Maintenance Programs
- Reliability Based Maintenance Programs

Inspections

Our professionals can review a machine's history and maintenance records, perform a thorough inspection of current condition, and provide the documentation for compliance with annual inspection requirements.

In addition, if any deficiencies are identified our technicians are prepared to recommend the best repair solution to keep you up and running.

Types of Manlifts

Telescopic Boom Manlifts

For use indoors or outdoors, Rolls through a commercial doorway, Removable cage converts unit to a 350 lbs material lift, With optional spanner kit.

Articulated Boom Manlifter

Booms range in reach from 20 feet to up in the clouds over 300 feet which allows for challenging handling jobs.

Trailer-mounted boom lift

Trailer-mounted booms feature an outstanding operating envelope, making them ideal to reach jobs high and low. With easy-to-tow mobility and simple pictograph controls.

Vertical Personnel Lift

Super-Straddle option to work over fixed seating, Quick set-up and simple to operate, A tilt-back frame allows AWP-36 and AWP-40 models to roll through

Diesel Scissor Manlifter

We have a full range of rough terrain diesel scissor lifts. Scissor Lifts are especially useful for working up alongside buildings or even indoors.

Crawler-Mounted Lifts

The traditional hydraulic controls allow an immediate and intuitive use. Makes it more reliable for rental activities

Types of Manlifts

Hazardous Environment Manlifts

These aerial work platforms, forklifts, tuggers, stackers and pallet trucks are self-propelled. Electric powered control that doesn't require an external air source.

Omni-Motion Scissor Lifts

Unique Omni-Motion Drive System provides machine movement in all directions and machine rotation around its center point for optimum positioning.

Atrium Track Drive Lifts

Atrium Track Drive Lifts are designed for buildings such as hotels, malls, airports, casinos or big buildings with high ceilings or difficult to reach windows and obstructions.

Electrically Insulated Manlifts

Electrically Insulated lifts are used where electrocution hazards exist such as working on any type of electrical wiring.

High Capacity Man & Material Lifts

Expand the capability and amount of work completed each day with the High Capacity Manlifts that include platform capacities up to 3000 lbs.

Pedestal Mount Manlifts

Pedestal mount manlifts can be bolted to floors or other structures and provide dedicated access to work locations.

Spare parts & Accessories

Hydraulic pump

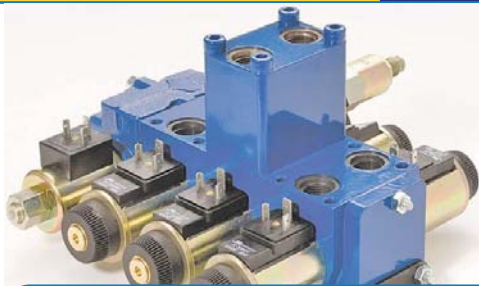

We build a wide variety of standard hydraulic power units and custom design power units to meet your particular needs.

Drive Control

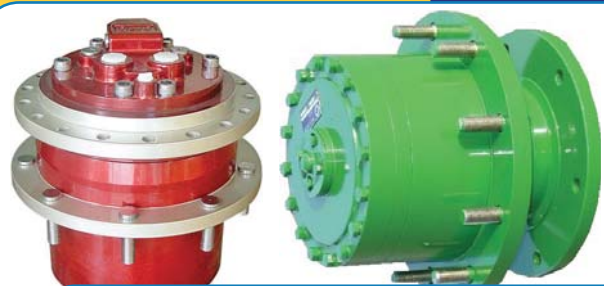

We supply all types of spring brake actuators suitable to s-cam, disc and wedge type brakes. Our products can be used on most main trucks, trailers and buses

Control Valve

Proportional Flow Control Valves come with multiple flow ranges which allow you to match your system requirements for the highest controllability

Drive Motor

We supply all types of spring brake actuators suitable to s-cam, disc and wedge type brakes. Our products can be used on most main trucks, trailers and buses

Manlift Batteries

JEMS is the pioneer in electrical power industry since 1988, and JEMS would like to introduce proudly

Battery-Charger

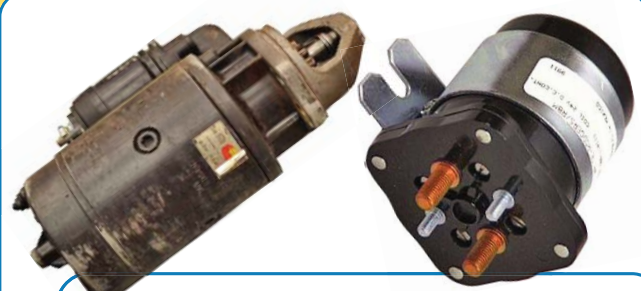

Greater cooling efficiency than your factory radiator, precision engineered as a direct OEM fit for smooth installation.

Control Boxes

JEMS is the pioneer in electrical power industry since 1988, and JEMS would like to introduce proudly

Full range of starters

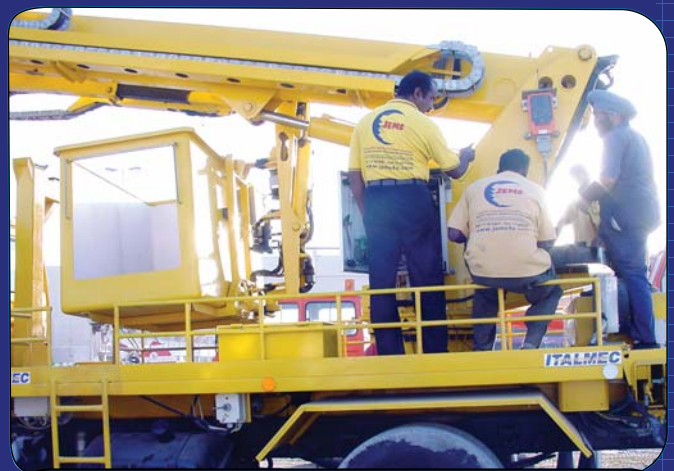

- Short circuit & reverse polarity protection.
- Automatic charging under all conditions.
- Low battery voltage monitor with dry
