4. Erection
5. Repairs
6. Upgrades
7. Maintenance
8. Consultancy
9. Survey
10. Solutions
11. Technology
12. Turnkey

## Med Water Equine Treadmill

Controlled, supervised exercise for fitness and therapy. Aqua walk and trot increases cardiovascular activity and muscle tone. Side window and overhead viewing platform. Rapid filling and emptying. Combined spa and salt water option.

## Equine Nebuliser

For use with metered-dose inhalers or wet nebulisation. Treatment can be completed within five minutes leaving more time for exercise and training. Treatment can be completed by the owner reducing the need for visits from a veterinarian

Compact, portable and battery operated for use where mains electricity may not be readily available. Up to three hours usage off a single charge. Very efficient device with 10mls of liquid aerosolised in less than twelve minutes

## Equus Mirror System

Unique mirror-system for indoor riding arenas with integrated layers. The Diamond-Mirror-System for indoor riding arenas offers advantages of product, extremely shockproof, impressing lightness, heat insulation with humidity barrier, mirror image nearly free from distortion, fire resistance of the integrated layers

## Equine Cold Spa

Cold Salt Hydrotherapy is used to treat (and prevent) a multitude of injuries in 2°C / 35°F saltwater. The spa has successfully addressed virtually all lower leg injuries. Treatment temperature alone induces a massive rush of blood and circulation which otherwise would not be present.

## Summerwinds Solariums

Ideal for private yards, livery yards and equestrian centres. The heat helps to improve blood circulation aiding muscle suppleness, allowing horses to work at their optimum and reducing the risk of injury. Also good to aid recovery and relaxation after work. Excellent for drying off a horse/pony after bathing, preventing chills and soggy rugs. Rapid filling and emptying. Combined spa and salt water option.

## Pulsed Electromagnetic Field Therapy

Combi Pro is a unique rug that provides both sequenced Pulsed Electromagnetic and Massage therapy to the horse. By enhancing venous blood flow, this combination of therapies can be used on many equine problems and conditions as well as having great results when used on a pre-warmup program before exercise and a recovery program after exercise. What's more, the Combi Pro rug treats the whole of the horse from the top of the neck to the tip of the tail and now also the shoulders and stifle.
